Get Ready

DUE DILIGENCE - the care that a prudent person might be expected to exercise in the examination and evaluation of risks affecting a business transaction.

Property acquisition, lease, or divestment - key times the Professional Engineers at CDW can provide a 360° perspective on the asset.

Plan Now

A property condition assessment is the start of the planning process. For long term planning of capital renewals, deferred maintenance, backlog funding and reserve fund studies, *make CDW part of your planning strategy.*

À La Carte

Our inspection reports are customized to meet your needs. In some cases, a *bottom line* approach is required. Others demand a more comprehensive study, including a review of: *Structures, Parking Garages, Exterior Cladding, Roofing, Mechanical Systems, Interior Finishes, Elevators, Electrical, Plumbing, Fire Protection, and Swimming Pools.*

Environmental Site Assessments are also performed, providing a single point of contact and simplifying the evaluation process.

The CDW logo consists of the letters 'C', 'D', and 'W' in a bold, blue, sans-serif font, separated by vertical bars.

From every angle

A Quality Investment

At CDW, our team of Professional Engineers has performed over 50,000 inspections since 1978. The momentum continues as we exceed our clients' expectations with prompt service, expert technical abilities and superior communication skills.

The Last Word

The CDW report is laid out in a clear, concise manner that outlines the condition and potential future expenditures. We make specific recommendations, including repair costs and priorities. *There is no better investment than a CDW assessment.*

Thank You

We thank you for choosing CDW and look forward to providing you with the highest caliber of professional building assessments.
